JAGUAR XF SEDAN AND NEW XF SPORTBRAKE 2018

THE ART OF PERFORMANCE
THE ART OF PERFORMANCE

Every day we push performance to its limit. Our performance. Our cars’ performance. We innovate, we engineer, we design. We master rules and then break them. Only to push further. Past the limits of convention. This is when performance becomes art.

Jaguar. The Art of Performance.
INTRODUCTION

THE CONCEPT OF THE XF

The 2018 Jaguar XF builds on the success of the 2017 Jaguar XF. Possessing an unrivalled combination of style and substance, it delivers an utterly seductive blend of design, dynamics and refinement to create a car that offers true excitement. All enhanced by state-of-the-art technologies that keep you connected and entertained.

The XF sits in the Jaguar range between the taut athleticism of the Jaguar XE and the supreme luxury of Jaguar XJ. The fusion of these outstanding Jaguar attributes is what creates the XF – one of the most dynamic, premium sports sedans. The New XF Sportbrake complements the distinctive ‘coupe’ lines and dynamism of the XF Sedan with even greater space and versatility.
THE XF - THE FACTS

An outstanding combination of advanced engineering, the latest technology and contemporary design sets the XF apart.

PERFORMANCE

Find your perfect balance of economy and power in the XF Sedan and Sportbrake engine range. Many engines feature our Ingenium technology, including the 2.0 liter 4 cylinder 180HP Turbocharged Diesel. The most powerful, XF engine, the 3.0 liter V6 380HP Supercharged, can sprint from 0-60 mph in 5.0 seconds and reach a top speed of 121mph*7 in 5.0 seconds.

SPORTSBACK REAR AIR SUSPENSION

Even when fully loaded, the comfort and precise handling of the XF Sportbrake is maintained by self-leveling rear air suspension. This system automatically inflates air springs to counteract the weight of heavy loads, helping ensure a level chassis and ride height.

DYNAMIC DESIGN

With a sleek, low swooping roofline and optional 17.2 sq ft panoramic glass roof, the XF Sportbrake makes no compromise between assertive style and versatility. Perfectly executed to carry more, its proportions have been shaped to achieve aerodynamic excellence.

ADDED INTELLIGENCE

Innovative technologies make driving easier. The XF offers optional adaptive LED headlights, Traffic Sign Recognition with Adaptive Speed Limiter, Lane Keep Assist with Driver Condition Monitor, Emergency Braking, Adaptive Cruise Control with Queue Assist*5, Park Assist, and now Blind Spot Assist*5. On the Sportbrake with Powered Gesture trunk, you can access the trunk when your hands are full. Simply present your foot under either rear side of the bumper and the trunk opens.

THE XF – THE FACTS

An outstanding combination of advanced engineering, the latest technology and contemporary design sets the XF apart.

PERFORMANCE

Find your perfect balance of economy and power in the XF Sedan and Sportbrake engine range. Many engines feature our Ingenium technology, including the 2.0 liter 4 cylinder 180HP Turbocharged Diesel. The most powerful, XF engine, the 3.0 liter V6 380HP Supercharged, can sprint from 0-60 mph in 5.0 seconds and reach a top speed of 121mph*7 in 5.0 seconds.

SPORTSBACK REAR AIR SUSPENSION

The XF offers optional adaptive LED headlights, Traffic Sign Recognition with Adaptive Speed Limiter, Lane Keep Assist with Driver Condition Monitor, Emergency Braking, Adaptive Cruise Control with Queue Assist*5, Park Assist, and now Blind Spot Assist*5. On the Sportbrake with Powered Gesture trunk, you can access the trunk when your hands are full. Simply present your foot under either rear side of the bumper and the trunk opens.

CONNECTIVITY

Every drive in the XF is enhanced by Jaguar InControl® Technologies. InControl is a suite of products and services that connects you with your XF and links the XF to the wider world. It ensures you are always in touch*¹.

LIGHTWEIGHT ALUMINUM ARCHITECTURE

The Lightweight Aluminum Architecture of the XF creates a strong body that delivers precise and responsive sports handling.

ADVANCED DRIVETRAIN TECHNOLOGY

The XF offers All Wheel Drive with Intelligent Driveline Dynamics and Adaptive Surface Response (if fitted to model)**. This enhances the legendary Jaguar handling, agility and ride, and gives added assurance under conditions*5.

ADVANCED AERODYNAMICS

The XF has a low drag coefficient which enables it to cut through the air, reducing wind noise for enhanced refinement. The underside of the car is aerodynamically designed to be as smooth as possible, while apertures in the front bumper (grilles) allow for airflow through the wheel arches.

CRAFTSMANSHIP AND SPACE

Contemporary craftsmanship and a luxurious, practical interior with the space to stretch out and enjoy every trip. Front and rear passengers will appreciate leg, knee and headroom that are ample and generous. You can choose the optional 40:20:40 rear seating configuration for increased volume and versatility.

JAGUAR ELITECARE

Enjoy your Jaguar with peace of mind. The XF is backed by Jaguar EliteCare™ our exceptional 5 year / 60,000 mile coverage program including New Vehicle Limited Warranty, Complimentary Scheduled Maintenance, Roadside Assistance and Jaguar InControl® Remote & Protect™.

“It’s about paring it down to the bare essentials. Good designers have always said less is more.”
Ian Callum, Jaguar Design Director.

The XF demonstrates the Jaguar principles of design purity. Strong lines radiate dynamic character and enhance the vehicle capabilities – be it improving aerodynamics, visibility or stability. The XF is available with adaptive LED headlights†† complementing the Jaguar signature ‘J’ blade Daytime Running lights and giving the vehicle a striking on-road presence. LED light quality is closer to daylight helping to distinguish objects.

*Please see page 103 for further information.
†Optional feature, Xenon headlights are also available depending on the model chosen.
The sweeping exterior design of the XF is naturally aerodynamic. Its advanced form enhances handling, dynamics and refinement. Airflow is carefully managed through and around the car’s intakes: either side of the front grille draw air in, then channel it out from the wheel arches to reduce turbulence. As air flows along the car, pressure differences that can cause drag are minimized by the flush, aerodynamically optimized sides.

At the rear, the XF sedan tail lights feature a distinctive, Jaguar F-TYPE inspired, double roundel and intersecting horizontal detail. The LED brake lights are not only brighter than halogen bulbs, they use less energy. LEDs also illuminate faster – so following drivers can react more quickly to braking. Within the tail lights is a pinstripe graphic – one of the many exquisite finishing touches on the XF.

Vehicles shown: XF SPORTBRAKE S in YULONG WHITE and XF SEDAN R-SPORT in CORRIS GREY with optional equipment.
Open the door and the Start button entices you inside. Pulsing with a heartbeat it creates an emotional connection between driver and machine. Its 72 per minute double beat is the same as a jaguar cat at rest. The XF is poised, ready for action. Now push the Start button. The car awakens and, if fitted, its mood lighting illuminates. With perfect choreography, air vents rotate open when the air conditioning is in use, the JaguarDrive Selector™ rises smoothly, and the engine growls – all inspiring you to anticipate the drive ahead.

The XF interior offers outstanding comfort, a sense of wellbeing and a wealth of choices. The number of switches and buttons is kept to a minimum to keep the look clean and tidy, as well as making them easy to use. Whichever XF interior combination you choose, materials used are always of the highest quality. Leather and finishes are selected with the greatest care to ensure that, inside the XF, everything is luxurious to the touch. Whether you prefer aluminum, carbon fiber, or wood veneer finishes to complement the beautiful selection of materials, your XF will always look and feel just right.

The XF Sportbrake offers a new ionization system that improves air quality. With this optional system, air is passed through an ionizer that filters and purifies the airflow before it is circulated within the cabin. This helps to neutralise odors and minimise bacteria and pollution for a more pleasant and healthy in-car environment.
In both XF Sedan and Sportbrake, the rear of the cabin is a destination of luxury, choice and space. With generous rear knee room, rear legroom and rear headroom, there’s plenty of room to relax. It all adds up to greater comfort and well-being for passengers.

Available interior mood lighting enhances the interior atmosphere. Opt for the Luxury Interior Upgrade Package and Configurable Interior Mood Lighting will offer you a choice of ten interior colors. In addition, the Four-zone Climate Control will give individual passengers the opportunity to set their own temperature and airflow.

At 17.8 cubic feet, the cargo space of the XF Sedan offers plenty of carrying capacity. For even greater versatility, choose the optional 40:20:40 rear seating configuration – it increases cargo space to an impressive 31.25 cubic feet. This outstanding practicality is taken to the next level in the XF Sportbrake with 31.7 and 69.7 cubic feet of rear cargo space respectively.
The versatile interior of the XF Sportbrake is designed to meet the demands of your lifestyle. Its cargo space provides 31.7 cubic feet of space with the rear seats in place. Fold the rear seats down, and you’ll create a space that is 79 inches in length and features 69.7 cubic feet of luggage capacity plus discreet underfloor storage.

To make things a bit easier, the XF Sportbrake offers a Powered Gesture Tailgate as standard and Activity Key as an option. The Activity Key is a robust and fully waterproof wristband that allows you to enjoy a range of activities – from skydiving to swimming – while giving you immediate access to the car at all times. The conventional key fob can remain within the car as it is deactivated for security purposes.
The rear seats of the XF Sportbrake fold completely flat or can be divided with a 40:20:40 split, using a thoughtfully placed remote release that’s accessible from the tailgate area. Easy-to-use optional cargo space rails help further increase the adaptability of cargo space storage, and an available divider net prevents objects from falling onto the rear seats.

Introducing even more natural light and airiness to the interior, is the large, standard fixed panoramic roof in the XF Sportbrake.
Ingenium technology underpins the 2.0 liter 4 cylinder diesel and gas engines in the XF range. These low friction, all-aluminum engines have stiff cylinder blocks and twin balancer shafts to ensure inherently low levels of vibration, for smooth day-to-day performance. All engines are equipped with Stop/Start technology and smart regenerative charging – harvesting kinetic energy from braking to charge the battery.

The Ingenium 2.0 liter 4 cylinder 180HP Turbocharged Diesel offers impressive performance for an engine of this size. It offers high levels of torque – a balance achieved thanks to its variable geometry turbocharger. Adjusting to the changing flow of exhaust gases, it maximizes low speed torque for broad power and responsiveness that is uniform, progressive and avoids lag.
The XF offers a choice of gas engines, including two from our Ingenium range. With their lightweight, all-aluminum design, and widespread use of low-friction roller bearings, Ingenium gas engines are built for smooth, efficient performance. To guarantee a responsive drive and effortless acceleration, every XF gas engine makes use of a rapid-shifting, 8-speed Automatic Transmission. All engines are equipped with Stop/Start technology and smart regenerative charging - harnessing kinetic energy from braking to charge the battery.

**INGENIUM GAS ENGINES**

**UP TO 0-60 mph from 5.5 seconds**

The Ingenium 2.0 liter 4 cylinder 247HP Turbocharged Gas engine delivers outstanding usable power and torque. For excellent acceleration and effortless overtaking, maximum torque is available between 1,200-4,500 rpm. This engine twin scroll turbocharger is fed by an integrated exhaust manifold that synchronizes exhaust pulses from two separate pairs of cylinders – reducing turbo lag and improving engine response.

The Ingenium 2.0 liter 4 cylinder 296HP Turbocharged Gas engine has impressive power and balance. For almost instant boost and high efficiency, its low inertia twin-scroll turbocharger features low-friction ball bearings and a high flow compressor wheel. Underpinned by the turbocharger’s increased aerodynamic efficiency, the engine delivers rapid acceleration and maximum torque of 295 lb-ft between 1,500-4,500 rpm.

The XF offers a choice of gas engines, including two from our Ingenium range. With their lightweight, all-aluminum design, and widespread use of low-friction roller bearings, Ingenium gas engines are built for smooth, efficient performance. To guarantee a responsive drive and effortless acceleration, every XF gas engine makes use of a rapid-shifting, 8-speed Automatic Transmission. All engines are equipped with Stop/Start technology and smart regenerative charging - harnessing kinetic energy from braking to charge the battery.

**PERFORMANCE**

*Please see page 103 for further information. **Engine performance and efficiency figures representative of XF Sedan only. For detailed XF Sedan and Sportbrake technical specifications, see pages 92 to 93.

†Only available on XF Sedan. Introduced Fall 2017.

**3.0 liter V6 Supercharged Gas engine**

**UP TO 0-60 mph in 5.0 seconds**

The 3.0 liter V6 Supercharged Gas engine features a Roots-type twin vortex supercharger that provides linear delivery of power with splatter-free responsiveness. The result is performance much like larger engines. The engine also features dual independent variable cam timing to vary inlet and exhaust valve operation, working alongside lightweight pistons with ultra-low friction piston rings, for increased performance. For added refinement there is a twin, contra-rotating balance shaft system.
ADVANCED AERODYNAMICS

The XF form has been designed for aerodynamic efficiency and stability at highway speeds. With a drag coefficient as low as \(Cd = 0.28\)**, the Jaguar XF cuts through the air – helping to reduce fuel consumption and lower emissions. Every element exploits the maximum aerodynamic potential while preserving the stunning proportions of the XF. Apertures in the front bumper outer edges channel air through vents in the wheel arches and out over the front wheels. The airflow then passes along the XF sides where the doors have a flatter cross sectional profile to minimize air pressure differences and contribute further to reduced drag. Even the extensive under body protection is designed to make the XF as refined as possible.

**XF Sedan only. Drag coefficient for XF Sportbrake is \(Cd = 0.29\).

VEHICLE SHOWN: XF SEDAN IN SANTORINI BLACK WITH OPTIONAL EQUIPMENT

---

**Cd**: Drag Coefficient
Jaguar has been at the forefront of aluminum car construction for more than a decade. The latest innovation is our high-strength Lightweight Aluminum Architecture, which is strong and reduces weight. It is also stiff - underpinning the precise, agile handling of the XJ. Aluminum has also been used to form the body sides, hood and front wings. These panels are bonded together with a strong adhesive, then punched with zinc-coated, boron steel rivets that compress the adhesive to form an airtight bond and a strong, rigid structure. This cutting-edge process, coupled with the Lightweight Aluminum Architecture, contributes towards a weight saving of up to 265 lbs over the previous generation XJ.
ALUMINUM FRONT KNUCKLE
Designed to optimize stiffness and strength, the lightweight aluminum front knuckle helps improve the XF agility, responsiveness and refinement for sports car-like control.

CHASSIS AND SUSPENSION
ADVANCED SUSPENSION TECHNOLOGY

The XF responds with agility and performs with dynamism while maintaining ride comfort. It’s a unique balance that makes it a Jaguar. The ideal foundation for these driving dynamics is the light, yet strong and stiff, Lightweight Aluminum Architecture with its near 50:50 weight distribution.

The sophisticated front and rear suspension systems complete a chassis that achieves a superb combination of sportiness and refinement. Advanced damper technologies – both passive or adaptive – improve ride quality still further and extend the XF breadth of dynamic capabilities. The suspension control, agility and feedback give the XF the spirit of a sports car.

BRAKE SCOOP
A glass-filled polypropylene brake scoop channels air onto the brakes for enhanced brake performance during enthusiastic driving.

INTEGRAL LINK REAR SUSPENSION
Integral Link suspension allows the XF to realize an ideal combination of refined, luxurious ride and sharp, responsive handling. The system separates and independently manages the lateral, longitudinal and vertical forces acting on the suspension for enhanced control and comfort. Many components are forged or hollow-cast aluminum – the optimum production techniques for strong, lightweight suspension.

ALUMINUM FRONT DOUBLE WISHBONE SUSPENSION
Considered by Jaguar as the best configuration for a front suspension system, the aluminum double wishbone design is modeled closely on the F-TYPE for precise handling and steering response.
**ADAPTIVE DYNAMICS**

Whether you’re accelerating on the highway, cornering on country roads or navigating around town, optional Adaptive Dynamics is designed to modify the XF response to match the conditions and your driving style. It analyzes acceleration, cornering, throttle and brake pedal activity, as well as kickdown activation. Steering movement is analyzed up to 500 times a second and body movement up to 100 times a second. Using this information, electronically controlled adaptive dampers then constantly adjust the suspension settings and maintain the poise and comfort of the XF.

**ELECTRIC POWER ASSISTED STEERING**

Electric Power Assisted Steering (EPAS) offers outstanding feedback, control and immediate power assistance. The EPAS sophisticated computer management varies steering assistance as appropriate – increasing assistance for low speed maneuvering and improving feel at higher speeds. It also enables advanced driver assistance features such as Lane Keep Assist and Park Assist.

**CONFIGURABLE DYNAMICS**

Bringing technology from the F-TYPE, the optional Configurable Dynamics system allows you to set up the dynamics for throttle mapping, gearbox shift points, steering and damper setting to suit your performance driving needs.

**DRIVING TECHNOLOGY**

**DYNAMIC Mode**

Dynamic Mode revises the software of the vehicle to further enhance the sporting character. It sharpens the throttle response, increases steering weighting and performs gear-shifts more quickly and at higher engine speeds.

**ELECTRIC POWER ASSISTED STEERING**

Electric Power Assisted Steering (EPAS) offers outstanding feedback, control and immediate power assistance. The EPAS sophisticated computer management varies steering assistance as appropriate – increasing assistance for low speed maneuvering and improving feel at higher speeds. It also enables advanced driver assistance features such as Lane Keep Assist and Park Assist.

**CONFIGURABLE DYNAMICS**

Bringing technology from the F-TYPE, the optional Configurable Dynamics system allows you to set up the dynamics for throttle mapping, gearbox shift points, steering and damper setting to suit your performance driving needs.

**ADAPTIVE DYNAMICS**

Electric Power Assisted Steering (EPAS) offers outstanding feedback, control and immediate power assistance. The EPAS sophisticated computer management varies steering assistance as appropriate – increasing assistance for low speed maneuvering and improving feel at higher speeds. It also enables advanced driver assistance features such as Lane Keep Assist and Park Assist.
ADDED DRIVER ASSISTANCE

ALL SURFACE PROGRESS CONTROL

All Surface Progress Control (ASPC) technology is a low speed cruise control that helps the XF to cope with low traction situations. ASPC allows the driver to concentrate on steering the vehicle. Once activated, use the cruise control buttons to set a 'target' speed between 2.2 mph and 18.6 mph. The system then works to achieve and maintain that speed while exerting traction control*5.

ASPC is standard and gives XF drivers added assistance over slippery/loose surfaces, undulating terrain, and even while descending a difficult incline. It helps make the XF easier to drive in challenging conditions. ASPC also has a pull-away function allowing the vehicle to progress from rest on low grip surfaces and ascending gradients, as well as a hill descent function that controls vehicle speed on steeper inclines*5.

On the XF S AWD and the XF Sportbrake S Adaptive Surface Response (AdSR) is designed to recognize differences between surfaces to exploit the maximum available grip. AdSR constantly monitors the car’s environment and adjusts the appropriate engine and brake settings. Once selected, AdSR works at all speeds to support you in adverse weather and across challenging surfaces*5.

*Please see page 103 for further information.
The XF All Wheel Drive (AWD) system combines the agility and character of Rear Wheel Drive (RWD) with the increased security and traction provided by AWD. In normal driving, the XF is predominantly RWD to deliver handling purity, feel and balance. But when roads become more challenging, or when you accelerate more swiftly on low-grip surfaces, the system is designed to subtly channel power forwards enabling the XF to maintain improved traction for comfortable progress in various conditions*5.

The XF AWD uses a transfer case at the back of the 8-speed Automatic Transmission to manage the appropriate distribution of torque to the front and rear wheels. Engineered to ensure that the XF retains the dynamic behavior of a Jaguar car, the transfer case contains an electro-mechanically activated multi-plate clutch with an actuator to build hydraulic pressure. This pressure is quickly and accurately controlled to generate the required force in the clutch to transfer the optimal amount of torque to the front wheels.

Unlike other systems that react to wheel slip, Jaguar’s Intelligent Driveline Dynamics (IDD) software is predictive and uses sensors measuring throttle and steering inputs to anticipate wheel slip*5. IDD seamlessly co-ordinates these inputs and compares them with responses from the engine, transmission and traction control systems to calculate the traction available and distribute torque accordingly even before grip is lost from a standard (the XF car transition from RWD to AWD is in milliseconds). The result is a drive which blends the character of RWD with the capability of AWD, providing enhanced levels of performance and control*5.

*Please see page 103 for further information.

VEHICLE SHOWN: XF SEDAN S IN YULONG WHITE WITH OPTIONAL EQUIPMENT
TORQUE VECTORING

Enhanced Cornering Capability

Torque Vectoring is designed to improve capability through even the tightest corners. Torque Vectoring technology provides controlled independent braking on the individual inside front and rear wheels to add to the turning forces acting on the car. In most conditions, more braking pressure is applied to the rear inside wheel as this supports increased cornering capability, while the front inside wheel is braked for greater effectiveness and refinement. The result is reduced understeer for sharper turning and more consistent road holding. Torque Vectoring delivers increased sports-car-like agility and added driver assistance.

Torque Vectoring applies brake pressure to slow the inside front and inside rear wheels independently. Additional rotational force applied around the vehicle’s axis. Power is sustained to maintain constant speed of outer driven wheels.
The stability systems are designed to keep the XF balanced whether you’re driving enthusiastically or simply want some reassurance in challenging conditions.

**Dynamic Stability Control (DSC)** monitors the dynamic behavior of the XF, intervening to assist vehicle stability and improving available grip. DSC is designed to reduce engine torque and apply braking to the appropriate wheels to correct the car direction of travel by counteracting understeer or oversteer. The DSC system fitted to the XF has enhanced understeer control to reduce speed and help regain control more effectively*5.

**Engine Drag Torque Control** mitigates the chance of wheel lock-up caused by strong engine braking in slippery conditions. It acts by briefly increasing torque to the driven wheels as appropriate*5.

*Please see page 103 for further information.

*Graphical representation only.

**Vehicle shown:** XF SEDAN S in YULONG WHITE with OPTIONAL EQUIPMENT
The optional Head-up Display with laser technology projects key information onto the windshield, remaining clear even in direct sunlight. The crisp, bright image can display vehicle speed, navigation, cruise control notifications and Traffic Sign Recognition data, where available. This technology helps you minimize time spent looking down at the instrument cluster and can help you maintain continuous awareness of your speed*. Please see page 103 for further information.

*N.B. The Head-up Display is only available on JAGUAR models. Certain features may not be available on all models. Please consult your retailer for more information.
Jaguar InControl is our suite of advanced technologies that links both you and your XF to the wider world. Choose from two Jaguar InControl infotainment systems: Touch, available as standard, or upgrade to Touch Pro.

### Touch
- 8" Touchscreen
- 5" instrument panel display with analog dials
- Meridian™ Sound System (380W)
- HD Radio™, USB®, Bluetooth® and Aduit connections

### Touch Pro
- 10" Touchscreen with multi-touch gestures and customizable homescreen
- 12.3" instrument panel display with virtual dials and full screen 3D navigation map view
- Navigation Pro
- Meridian™ Surround Sound System (825W)
- 2 x USB connections
- CD/DVD Drive

OPTIOPNAL FEATURES
- SD Navigation
- WiFi Hotspot™
- SiriusXM® Satellite Radio
- InControl Apps™

Remote & Protect™ consists of SRS Emergency Call, Jaguar Optimized Roadside Assistance, Stolen Vehicle Locator and Remote smartphone app

Connected Navigation consists of InControl Apps™, door-to-door navigation and WiFi Hotspot™

For information on Touch see pages 46-47. For information on Touch Pro see pages 48-49.

*Please see page 103 for further information.

As we roll out InControl®, specific features described may be optional, and market or powertrain dependent. Please consult your local Jaguar Retailer for availability and full terms. Contact numbers require an appropriate SIM with a suitable data contract which will require further subscription after the initial term advised by your Retailer. Mobile connectivity cannot be guaranteed in all locations.

Third Party programs or applications may require an end user license from the supplier.
The Touch multimedia system is the hub for connectivity, control and entertainment. The key features are:

- **8” Touchscreen** at the heart of the center console. Clear and responsive graphical interface for quick control.
- **Bluetooth** phone connectivity allows you to link and control your smartphone via Touch either for phone calls or music playback: simple, easy and wire-free.
- **Remote & Protect** consists of SOS Emergency Call, Jaguar Optimized Assistance, Stolen Vehicle Locator and Remote smartphone app.

**Optional Features**

- Navigation with InControl Apps™, Wi-Fi Hotspot and SiriusXM® Satellite Radio.

*Please see page 103 for further information.*

**Explore Jaguar InControl® at JAGUARUSA.COM**

Explore the capabilities of the InControl Touch™ multimedia system by selecting from the following options:

**Navigation** makes planning journeys and following routes easy, thanks to turn-by-turn voice guidance, intersection views and 3D maps.

**Wi-Fi Hotspot** gives you the option to create a 4G Hotspot using the car antenna when you fit a SIM card. This strengthens your link to the outside world, for a more stable connection than an individual device could maintain. Connect up to eight devices to read emails, browse the web and download content.

**InControl Apps™** features a range of Jaguar approved apps that can be connected to the car from your smartphone. It ensures the convenient use of these apps that have been optimized specifically to enhance aspects of your in-car experience.

**Touch Features**

- **Remote & Protect** consists of SOS Emergency Call, Jaguar Optimized Assistance, Stolen Vehicle Locator and Remote smartphone app.

**Audio**

- **Meridian™ Sound System (380W).**

**Display**

- **8” Touchscreen.**

**Multimedia**

- **SD Reader, USB, Bluetooth® and AUX connections.**

**Touch Features**

- **Remote & Protect** consists of SOS Emergency Call, Jaguar Optimized Assistance, Stolen Vehicle Locator and Remote smartphone app.

**Optional Features**

- Navigation with InControl Apps™, Wi-Fi Hotspot and SiriusXM® Satellite Radio.

*Please see page 103 for further information.*

Enhance the capabilities of the InControl Touch™ multimedia system by selecting from the following options:

**Navigation** makes planning journeys and following routes easy, thanks to turn-by-turn voice guidance, intersection views and 3D maps.

**Wi-Fi Hotspot** gives you the option to create a 4G Hotspot using the car antenna when you fit a SIM card. This strengthens your link to the outside world, for a more stable connection than an individual device could maintain. Connect up to eight devices to read emails, browse the web and download content.

**InControl Apps™** features a range of Jaguar approved apps that can be connected to the car from your smartphone. It ensures the convenient use of these apps that have been optimized specifically to enhance aspects of your in-car experience.
TOUCH PRO

UPGRADE TO NEXT GENERATION INFOTAINMENT

The next-generation hardware and software of Touch Pro advances your vehicle connectivity and entertainment to the very highest level. The key features of the Touch Pro system are:

- **12.3” Full Digital Instrument Panel with virtual dials**: This highly-respectable, 10” Touchscreen at the heart of the center console is customisable by the homeowner and provides fast response times. Its interactive side panel makes multi-touch display easy.

- **Pre-set touch control**: Allows you to manipulate and interact with information swiftly and accurately. The Touchscreen responds in the same manner as a smartphone or tablet computer providing multi-touch gestures such as pinch to zoom and swipe.

- **12.3” Instrument panel display with virtual dials and full screen 3D map view**: Makes driving even more of a pleasure. It is housed in the instrument display directly in front of the driver. Select full screen 3D map view or choose one of four graphical themes to suit your personal preference.

- **Navigation Pro**: Offers many of its many innovative features the ability to set a destination and the system alerts you if you have insufficient fuel for the journey. It displays filling stations on the part of the route where you may be low on fuel. The system automatically displays parking options.

- **Navigation Guidance**: As we roll out InControl®, specific features described may be optional or powertrain dependent. Please consult your country-specific Jaguar website or local Jaguar Retailer for availability and full terms in your country. Certain features require an appropriate SIM with a suitable data contract which will require further subscription after the initial term. communion with your Jaguar Retailer is strongly recommended at all times.

The services, technologies and applications found within Connected Navigation provide you with the very best in connectivity and convenience¹. It offers many features including:

- **Route Planner Companion App**: Offers true door-to-door navigation. Pre-plan your destination and route via your Apple® or Android™ smartphones. The app will guide you to your car, where you will find your selected route available on the car Touchscreen. When you’ve completed your road trip, the app can guide you to a hotel or public transportation (where supported) to your destination.

- **Share your estimated time of arrival**: so your selected contact will know exactly when you will arrive, as calculated by the navigation guidance system. If you’re running late, the system can then send automatic updates via text or email, without any further action from you.

- **Commute Mode** allows the system to learn your commute and automatically advises you of the expected travel time based on live and historical traffic movements. The system learns the routes you take for a given destination and then advises which of those is the quickest.

- **Arrival Mode** displays interactive 360° street level imagery of your destination for seamless finishing to driving trips. It automatically displays again upon your arrival. You can simply tap the Touchscreen to select a nearby parking garage, which appears as an updated destination.

¹Please see page 50 for further information.
The XF offers an exceptional listening experience with a choice of two Meridian Sound Systems. Designed in conjunction with the British audio experts Meridian, these systems use innovative audio technology and precise speaker placement to give perfectly optimized sound quality.

The superb Meridian 380W Sound System has 11 speakers and is standard on all XF models. The optional 825W Surround Sound System has 17 speakers which ensure that, wherever you or your passengers sit in the XF, everyone will enjoy a rich, enveloping audio experience.

**Meridian™ Sound Systems**

- **380W Sound System**
  - 11 speakers
  - 12 amplifier channels
  - 380 watts
  - Front door waves tweeter midrange bass
  - Rear door waves tweeter midrange

- **825W Surround Sound System**
  - 17 speakers
  - 16 amplifier channels
  - 825 watts
  - Audyssey MultEQ Audio Equalization
  - Dynamic Volume Control

Diagrammatic representations of Meridian® 380W Sound System

Audio available with Touch and Touch Pro.

Vehicle shown: XF Saloon Prestige in Indus Silver with optional equipment.

Jaguar InControl® Technologies

Driver assistance

Jaguar World
EMERGENCY BRAKING

Should a potential collision be detected, the XF gives an audible forward collision warning. Visual warnings follow if the driver takes no evasive action. The system is designed to apply the brakes to help reduce the severity of an impact when driving below 50 mph. This system also includes pedestrian sensing.

LANE DEPARTURE WARNING

Lane Departure Warning notifies the driver if the system detects the car drifting out of its lane. The system will also apply some understeer and help to slow the car back into lane. Lane Departure Warning is designed to detect lane changes, lane markings or the road edge. To avoid sudden alert and a small vibration in the steering wheel.

LANE KEEP ASSIST AND DRIVER CONDITION MONITOR

Lane Keep Assist is designed to sense unintentional lane drift and to help steer the car back into lane. Driver Condition Monitor is designed to detect lapses in concentration due to tiredness by monitoring the steering wheel position and suggests taking a break via an audible alert and a visual notification in the instrument cluster.

TRAFFIC SIGN RECOGNITION WITH INTELLIGENT SPEED LIMITER

Traffic Sign Recognition (TSR) technology detects speed limits, including variable limits, and no passing signs via the forward-facing camera, then displays them to the driver. The Intelligent Speed Limiter uses TSR’s information, supported by map data from the navigation system, to help keep the XF within the appropriate speed limit.

PARK ASSIST

Park Assist makes parking in tight spaces easier than ever. The XF can accurately steer itself during both parallel and perpendicular parking maneuvers – the driver only has to control the brakes and accelerator. An exit-assist function can also guide the XF while leaving a parallel space.

BLIND SPOT ASSIST AND REVERSE TRAFFIC DETECTION

If your car detects another vehicle in or quickly approaching your blind spot, the Blind Spot Monitor system is designed to alert you via a small warning light in the corresponding exterior mirror. As an enhancement to this feature, Blind Spot Assist will apply steering torque to help guide you away from the vehicle in your blind spot if you begin to change lanes. Using the same radar system, Reverse Traffic Detection is designed to alert you via the Touchscreen of moving vehicles during reversing – for example, when leaving a parking spot with restricted vision.

SURROUND CAMERA SYSTEM

Helping with various maneuvers, from parking to getting in and out of tight spaces, the Surround Camera System gives you 360° exterior vision on the Touchscreen. To enhance this system further, new Forward Vehicle Guidance and Forward Traffic Detection are also available. Forming part of the Surround Camera System, Forward Vehicle Guidance provides the driver with an on-screen visualization of the vehicle and parking distance. Forward Traffic Detection helps avoid potential collisions in situations where forward maneuvers involve restricted views.

ADAPTIVE CRUISE CONTROL WITH QUEUE ASSIST

Adaptive Cruise Control uses radar technology to automatically adjust your speed to maintain a set distance from the vehicle ahead. If that vehicle slows, your XF reduces its speed to maintain a set distance. The XF resumes its pre-set speed as soon as the road in front is clear. Should the car in front stop completely, the Queue Assist function is designed to bring the XF to a smooth halt. Once the traffic moves, touch the accelerator and the XF will follow the car in front again.

The World of Jaguar

Choose an XF and you’re joining the exciting World of Jaguar. It makes owning and driving carefree and easy, as well as providing a range of exclusive services and lifestyle products.

Jaguar EliteCare

Enjoy your Jaguar with peace of mind. The XF is backed by Jaguar EliteCare, our exceptional 5 year / 60,000 mile coverage program including New Vehicle Limited Warranty, Complimentary Scheduled Maintenance, Roadside Assistance and Jaguar InControl Remote & Protect.

New Vehicle Limited Warranty

The New Vehicle Limited Warranty (the ‘Warranty’) lets you enjoy your driving with peace of mind and runs for a best in class 5 years or 60,000 miles, whichever occur first. The Warranty is fully transferable to subsequent owners and remains in effect throughout the Warranty coverage period.

Complimentary Scheduled Maintenance

Relax in the knowledge that long-term performance is assured with the Complimentary Scheduled Maintenance Coverage. It covers factory recommended scheduled servicing as detailed in the Passport to Service for 5 years or 60,000 miles, whichever occur first. A Service Interval Indicator will appear every 16,000 miles or every 12 months, to remind you to take advantage of your complimentary maintenance.

Genuine Parts

Jaguar Genuine Parts are designed, tested and manufactured to our uncompromising standards for quality, fit and durability. Each part is engineered specifically for the XF to contribute to optimum performance and to help maximize its lifespan.

Roadside Assistance

Jaguar Roadside Assistance provides help in motoring emergencies, from immobilization due to breakdown or accident to minor problems such as punctures. You can rely on our roadside assistance, whatever the situation, anywhere in North America during the vehicle’s warranty period.

The Jaguar Magazine

This is our own vibrant, cosmopolitan and contemporary magazine. Produced by a team of enthusiastic designers and feature writers, it goes behind the scenes at Jaguar as well as providing insight into the world of luxury, design, style and travel.

Jaguar Collection

The latest range from the Jaguar Collection has been crafted with the same design execution and attention to detail that goes into all of our vehicles. This is evident in our clothing range, premium leather items and luxury travel goods. To celebrate Jaguar’s heritage we also have a collection that honors past achievements and features race-inspired gift items and apparel. Visit shop.jaguarusa.com to browse the Jaguar Collection.

Please see page 103 for further information.
The Global Positioning System (GPS) uses satellites to determine the car's position. By cross-referencing this with satellite signals, the car can calculate its exact location.

Automatic four-zone climate control allows rear occupants to optimize cabin temperature and air flow for their individual position.

Jaguar’s innovative ECO MODE is available. Dead reckoning uses sensors to measure vehicle direction, wheel rotation and inclination. These measurements can be combined with GPS data to provide a more accurate calculation of the car’s position.

Configurable interior mood lighting highlights a number of key functional and styling features of your Jaguar inside and out. These features will correct errors of judgment in driving. Please consult your owner’s manual or local retailer for more details.

The multi-touch functionality of Touch Pro 10” display allows the screen to recognize multiple points of contact. The intuitive “pinch and zoom” gesture makes using the system’s features a two-finger, one-finger or finger-spread finger movement much easier.

Innovative 3D real-time traffic signs provide real-time information about traffic and help reduce your journey time. The system is available in 19 countries and is available as an option.

Adaptive full LED headlights improve visibility in low light conditions. Further complemented with LED daytime running lights, these headlights also integrate the vehicle’s aerodynamic signature. Multiple powerful LED emitters give a clearer light in low light conditions. Further complemented with LED daytime running lights, these headlights also integrate the vehicle’s aerodynamic signature. Multiple powerful LED emitters give a clearer light in low light conditions.

Rain, ice and snow mode is available. This provides direct control of the system’s features in a more natural, intuitive way, enabling gestures such as swiping and pinching on the touch screen.

Jaguar InControl provides direct communication to your chosen payment method at then-current rates. Fees and taxes apply. To cancel, you must call Jaguar InControl at 1.800.4.JAGUAR.

The Cd value is the coefficient drag of the car. It gives an indication of the vehicle’s aerodynamic qualities.

INTELLIGENT STOP/START technology stops the engine when indicating, as well as working in conjunction with Auto High Beam Assist (AHBA) if fitted to the car. This reduces the CO2 emissions of each Jaguar built in the UK since 2009 is 100% offset. For each ton of CO2 emitted in the manufacturing process, through driving 124,000 miles. But that’s not all. Every new Jaguar is designed to be the most energy efficient car possible.

Zooming street databases work to reduce risk of accidents. Do not operate system while in the navigation of commercial, industrial or other areas that are not legal to drive. Safety and air quality are always Jaguar’s top priority. Consequences of ignoring these safety warnings can result in the loss of control and possible injury. All Jaguar vehicles are equipped with airbags as standard. Airbags are not designed to deploy in all collisions. The airbag Supplemental Restraint System (SRS) is a crucial part of the car’s safety system. Infant seats are designed to be used in conjunction with the car’s safety belts and the SRS. Always follow the car manufacturer’s instructions for proper seat location and usage.

To meet our 25% reduction in joint European fleet average tailpipe CO2 emissions by 2015. We have exceeded our targets for two years running and look forward to delivering on our 2012 target. And we are on track to meet our 2015 target. We have reduced our assembly CO2 emissions of each Jaguar built in the UK since 2009 is 100% offset. For each ton of CO2 emitted in the manufacturing process, through driving 124,000 miles. But that’s not all. Every new Jaguar is designed to be the most energy efficient car possible.

Manufacturer and /or distributor may have reduced the list price of this vehicle. Please consult your local Jaguar Retailer for details.

Vehicle shown in this document contains features that will affect your safety or the safety of others. Always follow the car manufacturer’s instructions for proper seat location and usage.
