Mercedes-Maybach

2018

The personal rewards of striving to be the best are even more meaningful in the development of young people than they are for automobiles. Instilling the values of leadership, goal-setting, discipline and teamwork in youth is an investment in everyone's future. It's why Mercedes-Benz USA is collaborating with the Laureus Sport for Good Foundation, with an ongoing commitment to train and place hundreds of coaches for after-school and in-school sports programs in communities around the country. Sports offer kids more than the chance to be physically active and have fun. It's also an opportunity to have a mentor who can guide them, help them learn how to deal with major life issues, and help them grow stronger not just physically but in their character. As a Mercedes-Benz driver, you become a part of this effort to give hundreds of thousands of kids a better life today, and all of us a brighter tomorrow.

THE 2018 MERCEDES-MAYBACH

The bellman remembers your name. It has been nearly a year since you've stayed in this hotel, but as he opens your car door, you know exactly why you've come back. It isn't just the spaciousness and furnishings, nor the location and view. It's a feeling on arrival that you won't be disappointed—in fact, as far from that as one can get. You glance back from the walkway as the bellman's gloved hand gently guides the car's door to its latch. He not only knows you, he knows your Mercedes-Maybach: He lets the soft-close mechanism finish the task—like it's the bellman's bellman. As he turns toward the lobby with your bags, you share a brief grin. Yours is for the way he earned your trust. His is for knowing he has.

Extraordinary furnishings, an exceptional level of handcraftsmanship, and exclusive new luxuries raise the fine art of traveling by automobile to a new state of the art.

Extended benefits.

The last time you came here, you flew, even though it's only a few hundred miles from home. And while you were seated in first cabin, the remainder of your journey made you long for the glamorous days of flying portrayed in old photos and movies. The final announcement on the plane—the one where they say “We know you have a choice in airlines”—got you thinking. If you were to choose a mode of travel based purely on enjoyment, elegance and easiness, where would you be seated on your next trip?

You pictured yourself reclined in a leather-lined oasis while you relax with a movie, a chilled beverage, and a hot stone massage. There were no lines, no turbulence, and no waiting for your luggage. It would be finer than first class. It would be even more special than the Mercedes-Benz S-Class—itsself a pinnacle of luxurious travel, the forefront of innovation, and a beacon of inspiration for its entire industry. It would lengthen the wheelbase of that iconic sedan, and heighten its ability to satisfy your every sense. It would be grander in presence yet even finer in its details, with exquisite materials, incomparably crafted. It would be travel at your own pace. In your own space. To your own standards. It can be—it is—your own Mercedes-Maybach.

ENVIABLE POSITION

For any true leader, being envied is neither the goal nor a benefit. Admiration can feel rewarding. Emulation is an honor to earn. And while imitation can flatter, it's far more gratifying to be an inspiration. But none of these are what motivate a leader to lead. That comes entirely from within: the drive to invent and reinvent, to create and redefine, to advance and enhance. For Wilhelm Maybach, it was the drive to engineer the engine, and assist Gottlieb Daimler in the creation of automobiles that would go on to race and sell under the name Mercedes.

A history of making history.

What began more than 130 years ago has only accelerated since. More than 100,000 patents offer evidence. More important are the number of breakthroughs that set new standards for all cars upon their debut, and through continual advancement—some for decades—remain benchmarks today.

The Mercedes-Maybach is also an S-Class. Which means generations of firsts unify to form a new state of the art. Consider its agile yet supple suspension: It is 4-wheel independent (first innovated in the 1930s), multilink ('80s), and either adaptive ('90s) or fully active: The S650's camera-based MAGIC BODY CONTROL® adds a new CURVE function that can lean into corners like a skier or cyclist. You'll also find catalogs of breakthroughs in the new biturbo V8 and 4MATIC® all-wheel drive of the S560.

But reading the specs of your Mercedes-Maybach can't compare to feeling them, and it's engineered to be uniquely rewarding from any of its seating positions. From the helm, eight or 12 twin-turbocharged cylinders deliver a red-blooded rush in a cool-headed hush. From the spacious rear cabin, the rigid body, supple chassis and advanced technology perform every move with poise and precision. Passengers may admire the driver's enthusiasm. The driver is sure to notice the passengers' bliss. But neither is likely to wish they could trade places. That sense of envy is left to those in other cars—and those who make other cars. For anyone who can turn admiration into inspiration, someday they may get to experience what you're enjoying right now. Perhaps you'll even lead them there.

The performance legacy that a Mercedes-Maybach advances can be summed up in two ways: Unsurpassed experience. And an unsurpassed experience for you.

UNDILUTED GRANDEUR

There was a time when one didn't merely buy a luxury automobile. One would commission it, sending a bare chassis off to a coachbuilder who would fabricate its body and fashion its interior. A notable exception was Germany's Sindelfingen Coachworks. Here, the most highly skilled of Mercedes-Benz artisans painstakingly crafted cars in-house that occupied the same echelon in motoring society as other marques' outside body makers. Today, they may share the same museum floor or the lawn at a concours d'elegance. But unlike most of those coachbuilders—and even many of the car brands—automobiles of the finest order are still being crafted in Sindelfingen.

On a grand scale, to the finest detail.

The time it takes to create your Mercedes-Maybach is evident on every surface, from its brilliant chrome grille to the hand-polished wood encircling its cabin. Its ceiling, door sills and sunvisors are tailored in fine Nappa leather. Nappa leather also swaths the seats, doors, armrests and dash trim—with diamond-pattern stitching, plus a pair

of embroidered pillows for the rear cabin. Careful inspection will reveal that your eyes are not the first to do so: Note, for example, how the stitches never touch the tiny perforations that ventilate each seat. Or how square button tufts embellish the available *designo* semi-aniline leather.

While eight additional inches of wheelbase extends rear-seat comfort appreciably, the body is not merely stretched. Bespoke rear doors and quarters flow with grace and grandeur, a fitting—and tailor-fit—tribute to the coachbuilders in its unique heritage. It's sculpted to carry itself with elegance, and to carry you with a sense of majesty.

What makes a car tomorrow's classic starts with how captivating it is today.

UNDIVIDED ATTENTION

Of all the restaurants in town, this is your go-to. Sure, it's fun to check out new spots and up-and-coming chefs. But this is the only place that always has something new, yet they also know exactly how you like it, without making you spell it out every time. It's the perfect balance of temptation and satisfaction—with the only constant being that you always enjoy the experience.

The way it makes you feel.

The ride home from dinner tonight will be very different from the ride in, but thanks to your Mercedes-Maybach, your journey can ideally complement the destinations they lead to. A new, first-of-its-kind system called Energizing Comfort Control focuses on your well-being like a dedicated team of attendants—and like never before. With a simple menu selection, its six programs aim to soothe, stimulate and satisfy your senses with a 10-minute ritual of targeted comforts: Cabin air is purified and subtly fragranced. The seats, cabin surfaces and ambient lighting can be warmed or cooled in temperature or hue. And from music to massage, further elements join in to relax you or rejuvenate you in body and spirit.

Selecting "Refresh" as you left the office, the ventilated seats seemed to draw away the day's stress. Cabin air was cooled and cleansed—ionized by an electric charge. It brought to mind the freshness that's in the atmosphere after a summer thunderstorm.

Heading to dinner, "Pleasure" immersed you in upbeat music—including some from your own phone—further enhanced by the ambient lighting, subtle aroma, and lower-back massage. Later, as the evening draws to a close, "Warmth" will envelop you in cozy comfort—heating the seats, armrests, door trim and steering wheel, and setting a tone of toasty ambiance in light and sound.

Tonight, a restaurateur and her team will again send you home feeling not merely sated, but nourished to your soul. They'll surely have earned their coveted star rating. And for the first time, your automobile will deliver you to your door feeling not just satisfied, but nurtured. It, too, will earn the Star that stands proud atop its grille. You may almost be tempted to leave a tip.

Industry-leading indulgence: A symphony of air, aromatherapy, ambient lighting, massage and music can refresh your senses and relax your body.

Extraordinary measures

Nothing overlooked.

A Mercedes-Maybach sedan extends the pleasures of motoring to new dimensions. Its basis is a car that has set the standard for all automobiles for generations, but it's no mere stretch of the iconic S-Class. Far more important than its added length are the lengths it goes to satisfy your comfort and yet be a joy to drive. The spaciousness of its accommodations is outmeasured by how accommodating it is, from seats that support and soothe to technology that can adapt to and even anticipate your needs. And while its majestic design and meticulous detailing are distinctive, it's also one of the most distinguished ways to travel.

Nothing underachieved.

The 2018 Mercedes-Maybach portfolio lets you choose from two powertrains to suit your driving needs, and then outfits both of them to the same exquisite standard. The new S 560 4MATIC Sedan teams a 4.0L biturbo V8 with the added year-round confidence of permanent all-wheel drive.³ Its AIRMATIC[®] suspension responds with

fast finesse to changing loads, challenging roads and driver-selected modes, thanks to computer-controlled air springs. With 463 hp, 516 lb-ft of torque, and a smooth new 9G-TRONIC 9-speed transmission, it can whisk you to 60 mph in 4.8 seconds⁴—to make merges seamless, and the acquisition of cruising speed feel effortless.

In the new S 650, a handcrafted biturbo V12 matches sublime smoothness with extraordinary strength. Sending peak output of 621 hp and 738 lb-ft of torque to its rear wheels, it can reach 60 mph in 4.6 seconds. Fully active MAGIC BODY CONTROL[®] uses a camera to scan ahead, to sense bumps and dips before you feel them. Its advanced hydraulics can actively generate forces to help counteract the effects of the road surface on ride and handling. And a new CURVE feature can lean into corners much like a slalom skier does, to help maintain your comfort even on winding roads. Quite likely the most advanced suspension in production, the dramatic moves it makes at each wheel aim to keep the car's body steady—and more importantly, to keep your body at rest and feeling at ease.

Nothing overstated.

Polished chrome accents highlight a new front apron and underscore a grand double-bar grille. Redesigned LED headlamps display distinctive triple-band running lamps by day. By night, their new Ultra Wide Beam technology reveals more of the road, while the new taillamps glisten with a "stardust" effect. And whether parked or in motion, its wheels match presence with poised performance. A sizable 20", they're available in a variety of styles that includes two exclusive forged-alloy wheels.¹ If your road conditions demand a more complaisant tire specification, 19" wheels are available as well. The promise a Mercedes-Maybach makes with its styling, it upholds with its substance: A powerful sense of grace born equally from athleticism and aesthetics.

A Mercedes-Maybach carries itself as elegantly as it carries its passengers. It's not merely stretched but artfully, and aerodynamically, sculpted to command the eye as well as the road.

Whether you're its pilot or a passenger, a Mercedes-Maybach raises first-class travel to new heights without leaving the ground.

Crafted for comfort.

Whether you're driving or being driven, a Mercedes-Maybach is designed to elevate your experience. Its front seats are heated and ventilated. Their support is precisely and easily adjustable via visual on-screen menus, from your shoulders down to your thighs. In corners, they can actively boost your side support. The menu of massages might outdo your favorite spa, from soothing "hot stone" treatments to invigoration of your muscles on a long journey. And in addition to the steering wheel, all the armrests and door trim can be warmed, too.

Virtually all of these benefits are afforded to the rear cabin as well—whether the outboard positions of the standard 3-passenger configuration or the available twin Executive seats. Both seating setups also provide power calf rests and up to 43° of recline on both sides. The right passenger also enjoys a power footrest, plus controls on the door to power-adjust the right front seat for even greater legroom when there is no front passenger present. Dividing the twin Executive seats, a wood-trimmed console conceals heated and cooled cupholders and a pair of sleek aluminum and leather-trimmed fold-out writing tables. A refrigerated compartment⁵ can be provided behind the center armrest, as can a set of magnetic-base champagne flutes by renowned silversmiths Robbe & Berking.[®]

Exclusive Nappa leather is fitted by hand to the seats, ceiling, dash, and virtually every cabin surface that's not already trimmed in wood or satin aluminum, nor occupied by a functional feature. Even more exquisitely crafted *designo* semi-aniline leather is available in diamond-quilted Silk Beige with any of three contrasting color accents and a pair of matching lap pillows. Your options in hand-polished wood trim include the classical warmth of Light Burl Walnut, dramatic Black Poplar, and Black Piano Lacquer with or without blonde pin-stripes in a "Flowing Lines" pattern.

Appointed for ambiance.

Powerful yet quiet 4-zone climate control is augmented by an ionizing purifier and an atomizer that can subtly diffuse any of six fragrances, pleasing your senses without lingering on surfaces. New 64-color LED ambient lighting offers multiple zones, dual-color themes, or gently changing hues that tie in with Energizing Comfort Control. You can welcome in the sun and stars via the Panorama roof, or keep harsh rays and prying eyes at bay with power sunshades overhead, behind you, and in the rear-cabin side windows. And by embedding electromagnetic particles into the glass of the Panorama roof, the available MAGIC SKY CONTROL[®] lets you darken it electrically.

From Germany's renowned handcrafter of fine home audio, the Burmester[®] High-End 3D Surround Sound System's 1,190-watt amp mixes analog and digital signals for natural sound in any musical genre. Its 26 speakers include rotating illuminated tweeters, surround-sound speakers in the ceiling, and a trunk-mounted subwoofer with its own 400-watt amp. The Rear Seat Entertainment system includes a pair of flat

screens and wireless remotes for individual control of viewing and comfort options. Standard COMAND[®] includes navigation⁶ with live traffic, and integrates Apple CarPlay[™] and Android Auto.⁷ Wireless charging for compatible phones⁸ is available in the front and rear cabins. And voice control can learn how you talk, and operate a variety of entertainment and comfort features.

Engineered to ease your way.

A pioneering network of standard cameras, multirange radar and other sensors can watch the road ahead and all around, to help make driving safer and easier. Its systems include: Active Distance Assist DISTRONIC[®] cruise control and Active Steering Assist,⁹ Active Blind Spot¹⁰ and Lane Keeping¹¹ Assists, Cross-traffic and pedestrian detection,¹² and Night View Assist PLUS.¹³ New enhancements include Route-based Speed Adaptation that taps into GPS data to enhance DISTRONIC cruise control, plus one-touch Active Lane Change Assist,¹⁴ Active Speed Limit Assist,¹⁵ Evasive Steering Assist,¹⁶ and Congestion Emergency Braking.¹² In all, it's the state of the art in staying ahead of delay and above the fray.

Hand-finished wood and hand-fitted leather let you ride in timeless luxury. Groundbreaking technology drives the automobile into a new age of motoring.

*The Vision Mercedes-Maybach 6 Cabriolet:
Heritage charges toward tomorrow.*

A vision of the future debuts at the world's most prestigious classic car event.

The annual Pebble Beach Concours d'Elegance gathers some of the most significant and celebrated automobiles in history. And while many are one of a kind, their common link is that each was once boldly ahead of its time. The Vision Mercedes-Maybach 6 concept is both a tribute to the handcrafted cabriolets of the past, and a sensual, emotional preview of the future. Riding on 24" wheels, it wraps a body nearly 20 feet long around a 750-hp all-electric powertrain and a truly *haute couture* cabin in crystal white Nappa leather.

Mercedes me makes it easy to stay connected to your car—and to your life. It can make any trip easier, more enjoyable, or more entertaining. And it'll bring you a world of rewards for being part of the family. Get started at MBUSA.com/mercedesme

YOUR WORLD IS RIGHT AT YOUR FINGERTIPS

From connection to inspiration.

Driving a Mercedes-Benz opens up a world of special benefits. The Mercedes me app on your smartphone teams with five years of mbrace® Connect services—standard.² Together they can keep you in touch with your car, let you remote-control numerous features, and offer you easy access to your dealer, Mercedes-Benz Financial account, or even special events and benefits geared exclusively to Mercedes-Benz owners.

The power of a tap, or your voice.

Mercedes me lets you remote-start your car from your iPhone® or Android® phone, plus lock, locate and monitor it via your phone, Google Home or Amazon® Alexa. ENDNOTES

- * Item is optional or not available on some models. See Packages and Options listing in this brochure or visit MBUSA.com for more information.
- 1 Lower-aspect-ratio tires and accompanying wheels provide substantially increased treadwear, increased tire noise and reduced ride comfort. Serious wheel and tire damage may occur if the vehicle is operated on rough or damaged road surfaces or upon encountering road debris or obstacles. These tires are not designed for use on snow and ice. Winter tires mounted on appropriately sized and approved wheels are recommended for driving in those conditions. Models with Extended Mobility tires are not provided with a spare tire.
 - 2 Mercedes me and Mercedes-Benz mbrace® services operate only where cellular and GPS satellite signals are available, which are provided by third parties and not within the control of Mercedes-Benz USA, LLC. Five years of the mbrace Connect package are included with new-vehicle sales and leases at an authorized Mercedes-Benz dealer. Subscriber Agreement is required for service to be active. Secure, Concierge and Entertain services require acceptance of the complimentary mbrace Connect services, and paid subscriptions after their trial periods. Some services are only available on select vehicles. Your PIN is required to use certain services. WiFi and streaming apps require an mbrace Entertain subscription. Connection may be limited by cellular signal. Apps may be introduced, updated or deleted at varying dates, and may also require a vehicle software update. Some services may be limited or restricted in some areas. Driver is responsible for complying with traffic and other laws. Mobile app is compatible with Apple iPhone® models running iOS 7.0 or later, and Android-based phones running OS 2.3 or later. See your dealer or MBUSA.com/mercedesme for details.
 - 3 No system, regardless of how advanced, can overcome the laws of physics or correct careless driving. Please always wear your seat belt. Performance is limited by available traction, which snow, ice and other conditions can affect. Always drive carefully, consistent with conditions. Best performance in snow is obtained with winter tires.
 - 4 Stated rates of acceleration are estimated based upon manufacturer's track results and may vary depending on model, environmental and road surface conditions, driving style, elevation and vehicle load.
 - 5 Available refrigerator box may reduce trunk space, but is removable.
 - 6 While the navigation system provides directional assistance, the driver must remain focused on safe driving behavior, including paying attention to traffic and street signs. The driver should utilize the system's audio cues while driving and should only consult the map or visual displays

- once the vehicle has been stopped in a safe place. Maps do not cover all areas or all routes within an area. Online features require a subscription and one or more mbrace Packages.
- 7 Apple CarPlay™ is a product of Apple Inc. Android Auto is a product of Google Inc. Device and app providers' terms and privacy statements apply. Requires connected compatible device and data plan. Apps, content and features are selected solely by their providers. Connection to apps and streaming services may be limited by the device's network connection. Data usage is routed through device and subject to fees, charges and restrictions in user's wireless plan. Vehicle's factory audio/information interface, including COMAND® navigation and the apps of Mercedes-Benz mbrace®, may not be used simultaneously with Apple CarPlay or Android Auto. When Apple CarPlay or Android Auto is in use, the steering-wheel voice control button accesses Siri® or Google voice recognition software for voice commands.
- 8 Wireless charging available only for devices with compatible technology and size. See Operator's Manual for more information. Devices sold separately.
- 9 Active Distance Assist DISTRONIC is no substitute for active driving involvement. It does not adapt cruising speed in response to stationary objects, nor does it predict the curvature and lane layout of the road ahead or the movement of vehicles ahead. It is the driver's responsibility at all times to be attentive to traffic and road conditions, and to provide the steering, braking and other driving inputs necessary to retain control of the vehicle. Drivers are cautioned not to wait for the system's alerts before braking, as that may not afford sufficient time and distance to brake safely. Braking effectiveness also depends on proper brake maintenance, and tire and road conditions. See Operator's Manual for system's operating speeds and additional information and warnings.
- 10 Active Blind Spot Assist may not be sufficient to avoid all accidents involving vehicles in your blind spot and does not estimate the speed of approaching vehicles. It must not be used as a substitute for driver awareness and checking of surrounding traffic conditions. See Operator's Manual for system's operating speeds and additional information and warnings.
- 11 Driving while drowsy or distracted is dangerous and must be avoided. ATTENTION ASSIST® is a warning system only. ATTENTION ASSIST and Active Lane Keeping Assist may be insufficient to alert a fatigued or distracted driver of lane drift and cannot be relied on to avoid an accident or serious injury. See Operator's Manual for system operating speeds and additional information and warnings.

Maybach Accessories

Icons of luxury, for the road well-traveled.

Engineer and motoring pioneer Wilhelm Maybach followed a simple maxim in his work: "To create the very best from the very best." It's evident today in the automobiles that bear his name, and in luxury accessories handcrafted in Germany to complement them in style, quality and brilliant functionality. The Traveller and Voyager bags are elegantly designed to accompany you on any journey, or even to the tennis court or gym. Exquisite vegetable-tanned calfskin is discreetly reinforced from within to enhance strength, while generous and thoughtfully designed compartments make them as versatile as they are beautiful. To learn more, see your Mercedes-Maybach dealer.

- 12 Drivers are cautioned not to wait for the system's alerts before braking, as that may not afford sufficient time and distance to brake safely. Braking effectiveness also depends on proper brake maintenance, and tire and road conditions. See Operator's Manual for system's operating speeds and additional information and warnings.
- 13 Night View Assist PLUS does not replace the use of headlights and must not be used as the primary visual source for the driver. System is designed not to flash detected animals, as their reactions are unpredictable.
- 14 Active Lane Change Assist is no substitute for active driving involvement. It estimates but does not predict the curvature and lane layout of the road ahead or the movement of vehicles ahead. It is the driver's responsibility at all times to be attentive to traffic and road conditions, and to provide the driving inputs necessary to retain control of the vehicle. System may not detect some objects, obstacles or vehicles in the area into which the vehicle would move. See Operator's Manual for system's operating speeds and additional information and warnings.
- 15 Systems are not substitutes for driver awareness to posted speed limits and other conditions. Driver is responsible for safely operating vehicle in accordance with local traffic laws and driving conditions.
- 16 No system, regardless of how advanced, can overcome the laws of physics or correct careless driving. Please always wear your seat belt. Driver's deliberate steering inputs are required to initiate the system's action, and can override its intervention at any time. See Operator's Manual for system's operating speeds and additional information and warnings.
- 17 Active Brake Assist may not be sufficient to avoid an accident. It does not react to certain stationary or suddenly moving objects or pedestrians, may not react in certain situations where objects cannot be clearly identified, nor does it recognize or predict the curvature and/or lane layout of the road or every movement of vehicles and pedestrians ahead. It is the driver's responsibility at all times to be attentive to traffic and road conditions, and to provide the steering, braking and other driving inputs necessary to retain control of the vehicle. Drivers are cautioned not to wait for the system's alerts before braking, as that may not afford sufficient time and distance to brake safely. See Operator's Manual for system's operating speeds and additional information and warnings.
- 18 Car-to-X services operate only where cellular and Global Positioning System satellite signals are available, which are provided by third parties and not within the control of Mercedes-Benz USA, LLC. Five years of the service are included, starting on the original retail sale or lease date from an authorized Mercedes-Benz dealer. System cannot detect and/or report every road

- hazard, and its effectiveness depends on the presence of other vehicles equipped with Car-to-X Communication. It is the driver's responsibility at all times to be attentive to traffic and road conditions, and to provide the steering, braking and other driving inputs necessary to retain control of the vehicle.
- 19 Audio/multimedia system must be turned on for system to operate.
- 20 Rearview camera and Surround View System do not audibly notify driver of nearby objects and are not substitutes for actively checking around the vehicle for any obstacles or people. Images displayed may be limited by camera field of view, weather, lighting conditions and the presence of dirt, ice or snow on the cameras.
- 21 Active Parking Assist is not a substitute for driver attention to the immediate surroundings, as well as people, animals or vehicles in or approaching the vehicle's maneuvering range. System cannot determine if a space is legally available or of a suitable surface for parking. See Operator's Manual for additional information, tips and warnings. Rear Cross-Traffic Alert is not a substitute for actively checking around the vehicle for any obstacles or people. It may not detect certain objects based on their size, path, proximity or speed and angle of approach, or due to sensor obstruction, and does not control steering angle. See Operator's Manual for additional information, tips and warnings.
- 22 PRE-SAFE PLUS cannot prevent a collision, and does not alert the driver of an impending collision or system activation. It does not intervene if vehicle is backing up, and does not apply the brakes if the driver is accelerating or Active Parking Assist is operating.
- 23 Excluded with Magma Grey/Espresso Brown and Mahogany/Silk Beige upholstery
- 24 SEE OPERATOR'S MANUAL FOR ADDITIONAL WARNINGS AND INFORMATION ON AIR BAGS, SEAT BELTS AND CHILD SEATS. Always use LATCH or ISOFIX to fasten a child seat in a vehicle with an Integrated Restraint System. For vehicles equipped with the optional rear-cabin air bags, only use a Mercedes-Benz approved booster seat. Never use an air bag-equipped seat belt to fasten a front- or rear-facing child seat or a non-approved booster seat.
- 25 Head-Up Display may not be visible with certain eyewear, including polarized glasses.
- 26 The purchase of a new, satellite radio-enabled vehicle includes a 6-month introductory subscription to the Sirius All Access package. If you decide to continue your subscription after your trial, the plan you choose will automatically renew and you will be charged according to your chosen payment method at then-current rates. Fees and taxes apply. To cancel you must call SiriusXM at 1-866-635-2349. See SiriusXM Customer Agreement for complete terms at siriusxm.com. All fees and programming subject to change.
